DETAILED ACTION

Allowable Subject Matter

1. Claims 1-19 (renumbered as new claims 1-8, 11-19, 9, and 10 respectively) are allowed.

2. The following is an examiner's statement of reasons for allowance: Kim et al. (U.S. Patent No. 6,532,530), the closest reference, does disclose a main processor, a co-processor and a program memory for saving instructions. However, Kim et al. (U.S. Patent No. 6,532,530) and the other cited prior art, do not teach or fairly suggest: a main program memory storing a first portion of coprocessor instructions; and the second portion of coprocessor instructions are fetched directly from the coprocessor program memory in combination with all the other limitations in claim 1 and the combination is not obvious.

Regarding claim 10, Kim et al. (U.S. Patent No. 6,532,530) and the other cited prior art, do not teach or fairly suggest: using a program address to fetch: m-bit instruction from a main program memory; and n-bit instruction from a coprocessor program memory, the n-bit instruction being fetched upon decoding a

predefined coprocessor code by the main processor in combination with all the other limitations in claim 10 and the combination is not obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
